

WORKSHOP
on
“UNEXPLORED ASPECT OF PIPETTES AND
CONSUMABLES”

(26th February 2020)

OVERVIEW

When we are working at the bench, accurate pipetting is crucial. Without accurate pipetting, our experiments would not be reproducible, our stock solutions may be inaccurate, and our assays may have large errors that make them meaningless. The accuracy of micropipettes and pipetting depends on researcher. It is needed to maintain the pipettes, practice good pipetting technique, and understand how they work as an integral for good laboratory practices.

OBJECTIVE

- To understand the array of pipettes and liquid handling instruments
- To gain the range of pipetting skills necessary to produce reliable data
